## PROJECTS

### Suburban Dictionary (Rails, JavaScript, Flux) - [Live](#) | [Github](#)

A RESTful full-stack web application inspired by UrbanDictionary, with a React frontend and a Ruby on Rails backend.

- ❑ Optimizes app performance by implementing custom SQL queries and prefetching data
- ❑ Filters database results with unique AJAX requests and manipulating the designated controllers.
- ❑ Ensures scalability and lightens the server-load by storing images in the cloud using AWS S3.

### Hexagon Havoc (JavaScript, HTML, CSS) - [Github](#)

JavaScript game allowing multiple players to compete simultaneously

- ❑ Did some game typey things showing how smart I am
- ❑ Did other game things to show I'm even smarter than previously thought
- ❑ Created a mind blowing feature that ensures me getting a job

### Treasure Mapping Objects (Ruby) - [Github](#)

ORM inspired by the ActiveRecord pattern

- ❑ Utilizes inspired metaprogramming to dynamically produce Ruby classes and methods based on SQL databases.
- ❑ Administers object-relational mapping and offers ability for single and multi step associations.
